Prompting is not just about asking a query. It's a technique that is both a science and an art. Here is an example:

---- Requirement ----

Your Task: Summary Prompt Design

Design a prompt that can generate a concise executive summary from a long article. Your output should include:

- 3 key insights
- 1 actionable takeaway
- Professional tone suitable for decision-makers

----- Solution -----

You are a senior analyst briefing a C-suite executive who has 90 seconds and zero patience. Read the article below and respond with exactly this structure:

EXECUTIVE SUMMARY

[One sentence. What happened and why it matters.]

KEY INSIGHTS

1. [Insight: sharp, specific, no fluff]
2. [Insight: a non-obvious angle or implication]
3. [Insight: the risk or opportunity hiding in plain sight]

TAKE ACTION

[One sentence. What should a decision-maker do Monday morning?]

No preamble. No filler. If it wouldn't survive a boardroom, cut it.

ARTICLE

{paste article here}

--- Why This Works ---

- The persona ("briefing a C-suite exec") sets tone without asking for tone
- The time constraint ("90 seconds") enforces brevity better than saying "be brief"
- The insight labels (non-obvious, hidden risk/opportunity) push past surface summaries
- The "Monday morning" rule forces a concrete, not vague, takeaway
- The closing kill rule acts as a built-in self-edit instruction
