

Yogesh Haribhau Kulkarni • You

AI Coach (Machine Learning, Natural Language Processin...

1m • 🌐

On this auspicious day, I am thrilled to announce a new initiative aimed at sharing my insights on various AI-related topics 🎉.

This initiative will comprise a series of talks on Artificial Intelligence (AI), Machine Learning (ML), Natural Language Processing (NLP), Generative AI, and Large Language Models (LLMs) 🧠.

These hour-long online sessions will be held on Saturday mornings from 9-10 am (India time) 🕒. They are free and open to all, with prerequisites such as familiarity with Python programming and college-level mathematics 📚.

Occasionally, I may host combo sessions featuring discussions, interviews, and hands-on sessions with other professionals in the field, all related to AI 🧑🏻.

Please note that this initiative is independent of any other affiliations I have, thus allowing me to cover any AI-related topic from any tech stack 💻. However, other Meetup groups and organizations are welcome to spread the word about these talks 🗣️.

The topic for each session and the Google Meet link will be announced a few days before (say on Fridays) in a LinkedIn post. This post will include a public link to the event, which you can add to your calendar 📅.

For the title of this initiative, I am considering various options such as (in the order of preference - most->least):

- "Let us AI" (remember a similar title?)
- "AI-mazing talks" (word-play, NLP, right?),
- "AI with Yogesh" (and Koffee with ...),
- "Lectures on AI" (again remember a similar title?),
- Feel free to suggest any other catchy/witty short title, in the comments or to my email: myfirstnamelastname at yahoo dot com .

The current plan is to kick off the series with a technical deep-dive into Large Language Models spread over a few Saturdays, covering aspects like how LLMs work, Prompt Engineering, Langchain, Fine-tuning, RAG, use-cases, and more .

Stay tuned for the announcement of the upcoming session. Looking forward to your active participation .
