### Yogesh Haribhau Kulkarni • You

Principal Architect (CTO Office, Icertis) | PhD in Geometric Modeling | Google Devel...  
2yr •

Co-founded Tensorflow User Group Pune, a voluntary effort to spread awareness/knowledge of Machine/Deep Learning using Tensorflow 2.0, an open-source-free Deep Learning library managed by [Google](#).

Gave a talk on ANN (Artificial Neural Network) as the first session in the 3-part series planned. Covered Machine/Deep Learning theory as well as tf.keras basics. The other co-founder, Jayesh Ahire, did an example walk-through.

Thanks to [Icertis](#) for sponsoring the venue and to [Manisha Khadge](#), [Umesh Kulkarni](#), [Behram Daruwalla](#) and their teams for the support.

Thanks to [Nikita Gandhi](#), [Siddhant Agarwal](#) and [Google India](#) team for the planning and FnB sponsorship.

Next topics in the series are: CNN (Convolutional Neural Network for Image Processing) and RNN (Recurrent Neural Network for Sequences).

Feel free to contact me on the meetup site of this group (<https://lnkd.in/f-4F-de>) if you wish to contribute any session/talk around Machine/Deep Learning, their applications, using Tensorflow framework.

Please note that, these sessions are (and will be) open and free to all.
