How do you evaluate AI models? 🤖 (Hint: Check the pic below!)

My younger daughter, who's in 10th grade, has an AI exam this Tuesday. While going through the syllabus and the textbook, I realized that today's students are learning (more than) enough to be considered AI literate—and that's wonderful!

📖 In the past, literacy meant being able to read and write. Later, knowing how to use a computer made you computer literate. Now, in this AI-driven world, you need to be AI literate—understanding enough AI to leverage it effectively.

For those still away or on the fence about AI, here's my suggestion: Learn at least as much as a 10th-grade student! It's totally doable.

Get a textbook (or a PDF).

Explore resources on YouTube (AI for Kids!!!)

No more excuses—start today!
