Verstehen Sie Deutsch?

If you follow what this means and if you're a STEM (Science, Technology, Engineering, Mathematics) student or professional, here's the scoop on some lesser-known news items:

- ➡ Job Alert in Europe! THIS country offering big pay to 5 high-demand tech jobs. <https://lnkd.in/d25pDWkv> 🌐
- ➡ German state looks to Maha to fill up 4L vacancies, plans tie-ups with ITIs. <https://lnkd.in/d38rWZEW> DE
- ➡ Pune : Baden-Wurttemberg Signs MoU With Maha to fill up 4 lakh vacancies. <https://lnkd.in/dUUxk9GU> 🏢

As someone who's been discussing the impact of AI on jobs across various platforms (blogs, posts, newspaper-articles), I foresee a challenging landscape in times to come. The oversupply of Computer-IT-AI branch students coupled with the relentless advancement of powerful AI tools (read 'ChatGPT' and likes) presents a unique scenario. You are seeing the effects already. Aren't you?

My suggestion?

Consider the hard-core branches/industries—Mechanical, Manufacturing, Aerospace, Civil, Electrical, Metallurgy, and Electronics (both degree and diploma holders, as well as ITI graduates). They may not be as fashionable and lucrative like the Software stream, but they promise a more resilient future, in my

opinion. And if you happen to know a foreign language like German, Japanese, your prospects get even brighter. 🌞 日本語がわかりますか 😊
