Just had a nice chat with with Adi Mazor Kario about AI adoption 🤖, which aligns well with my role as an AI Advisor.

We explored the following topics:

📌 How organizations can evaluate their readiness for AI and pinpoint the most promising areas for AI integration. #AIreadiness #opportunityidentification

📌 The essential skills and expertise an organization needs to effectively leverage AI capabilities. 🧠 #AISkills #expertise

📌 Fostering a data-driven culture that supports and encourages AI adoption within the organization.

📊 #dataculture #AIadoption

In this episode, we're joined by a leading AI advisor who has helped countless organizations navigate the exciting world of artificial intelligence.

We'll be discussing what organizations need to know to truly unlock the potential of AI, from building the right infrastructure to fostering a data-driven culture. Get ready for an insightful conversation packed with actionable advice!

Yogesh Haribhau Kulkarni, AI Advisor, PhD.

We will discuss:

- o How can organizations assess their AI readiness and identify the best opportunities for AI integration?
- o What are the essential skills and expertise needed within an organization to leverage AI effectively?
- o How can organizations foster a data-driven culture that supports AI adoption?
