Completed one more orbit around the Sun.

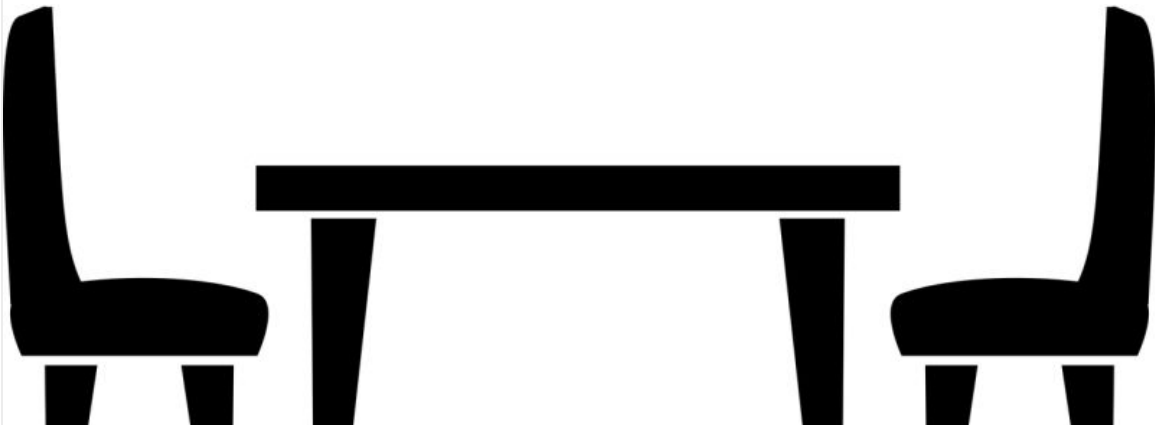

On this occasion, continuing one of the initiatives which was started last year. I have setup a dedicated time, say 2pm to 4pm (India time zone), every Saturday, to discuss queries you may have.

Queries could be technical, on topics such as Machine/Deep Learning, AI, Natural Language Processing, Geometric Modeling and intersection of them with other domains. They can be non-technical also, such as mid-career transition, career in Data Science and likes.

If you wish to setup such discussion, please mention "Interested" in the comments and send email to my firstnamelastname at yahoo dot com specifying the topic and also preferred date & half-an-hour time-slot. I will revert back with a meeting invite.

Needless to say, this effort is personal, voluntary and non-commercial. Free and open to all.

[Yogesh](#) sir, do we have any plans to publish videos/discussions with other participants? (Just a thought), to avoid repetitions and get quick answers to similar questions.

Also, very Happy birthday to you 😊. Thank you for your good work.

Good initiative, but time zone seems targeted towards people in India? Do you have a blog or YouTube channel where this will be recorded? I am interested in topic like reforms education system in India, bridging the digital divide, meaning of life, career transitions, etc.

Yes, currently Saturday afternoon India time, looks suitable to me. The sessions are typically specific to individual issues, so we are not recording. But lets see, if I can come up with content on generic topics.
