Your Wildest Dreams

At times, you have an idea in mind, a creative one, rather unreal, but you are not able to convey it visually or draw it.

OpenAI has come up with a solution. `DALL·E 2` can create original, realistic images and art from a text description. It can combine concepts, attributes, and styles.

You can be as imaginative (or crazy) as to ask for a picture for "An astronaut, playing basketball with cats in space, as a children's book illustration" and it will produce a wonderful image for it. Wild dreams!!

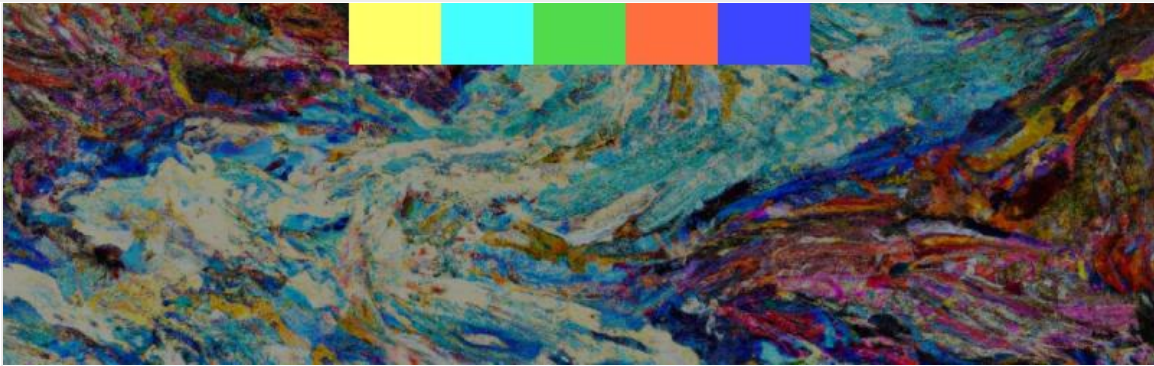

Don't believe? Try at <https://lnkd.in/ddZbgCD6>

If you change the description and it will change the picture accordingly, all that while taking shadows, reflections, and textures into account.

Once the API is available, I surely wish to get a picture for text description "Melting Clocks" and check how 'surreal' it is.

Advisor to some high-potential AI startups and enterprises

not taking anything away from this stupendous work....but the website indicated still forces me through a narrow path. narrow, especially considering the tremendous creativity they say can be exercised while using the software. perhaps i'm asking for full access - not possible right now, i know!!

I wonder how surreal Mr. Salvador would find this if he were around!
