In the ever-evolving landscape of technology, one must continuously adapt and embrace new opportunities for personal and professional growth. As I reflect upon my journey thus far, I find myself standing at a pivotal point in my career. With a deep passion for AI and a desire to make a meaningful impact, I have set my sights on becoming an AI Coach — a guide to help others navigate the intricacies of this transformative field.

The Power of Technical Storytelling

In the realm of AI, technical storytelling is a skill that can bridge the gap between complex concepts and practical understanding. As an AI Coach, my goal is to master this art, effectively conveying new technologies and their potential through engaging narratives, sketchnotes, talks and trainings. Just as a skilled storyteller captivates an audience, I aim to captivate minds, inspiring others to embrace the wonders of AI.

The Future is in LLMs + KG

In an era where attention spans are fleeting, the ability to deliver “Wow!” demonstrations holds immense value. By harnessing the capabilities of technologies like Large Language Models (LLM) and Knowledge Graphs (KG), I plan to create awe-inspiring showcases that highlight the power and potential of AI. Through interactive experiences and visually captivating presentations, I can ensure that my coaching sessions leave a lasting impact, igniting curiosity and sparking transformative ideas.

IKIGAI as the Core of AI Coaching

Ikigai, the concept of finding one's purpose and passion, serves as the foundation of my AI coaching journey. As I transition into this new role, I realize that my own experience in AI provides a unique perspective that can empower and guide others going through a similar transformation. By combining my expertise in visual communication with my AI knowledge, I can provide a comprehensive coaching experience that nurtures growth and cultivates success.

Mastering Doc/Gen/Vertex AI

To truly excel as an AI Coach, I am committed to acquiring mastery over cutting-edge tools and platforms. Doc/Gen/Vertex AI from Google Cloud represent the forefront of AI capabilities, enabling me to develop tailored solutions and empower individuals and businesses alike. By staying at the forefront of technological advancements, I can offer invaluable insights and guidance, cementing my position as a trusted AI expert.

Building a Strong Ecosystem

Remaining an active part of the Google Ecosystem as a Google Developer Expert (GDE) is crucial to my journey as an AI Coach. By collaborating with fellow experts and enthusiasts, I can continuously learn, grow, and contribute to the community. Additionally, becoming an Authorized Trainer Partner and (an Unofficial, to begin with) Developer Advocate will further solidify my position as a reliable source of AI knowledge, allowing me to reach a broader audience and make a positive impact.

As I embark on my quest to become an AI Coach, I am filled with excitement and determination. The fusion of technical storytelling, captivating demonstrations, ikigai-driven coaching, and mastery of cutting-edge AI tools will pave the way for an enriching journey of knowledge sharing and growth. Through my personal experiences and industry insights, I aspire to inspire others, equipping them with the tools and mindset to navigate the realm of AI successfully.
