Not sure how many of you know or use LaTeX (the typesetting system, just to be clear 😊). Old-timers and those into writing research would mostly be familiar with it.

Did you know that Anthropic has added support for LaTeX rendering directly in the Claude Web interface? 🎉

As someone who's been leveraging ChatGPT and Claude to format LaTeX-beamer slides, I'm thrilled about this update. Here's a sample prompt I've been using:

--

You are an expert in <domain>. You have been asked to prepare a slide deck as per LaTeX beamer format shown below. The points should be based on summarizing the following content. Keep each point short but self explanatory.

LaTeX format

%%%

\begin{frame}[fragile]\frametitle{Slide Title}

\begin{itemize}

\end{itemize}

\end{frame}

Content to summarize

<contents>

--
Want to give it a try? 🚀
