Fascinated by apps like ChatGPT? Wish to experiment with models behind them? Even open-source/free models? Look no further... LangChain is the way to go ... 🕒

LangChain is a powerful open-source library that provides developers with the necessary tools to build applications powered by large language models (LLMs) It is a framework that enables quick and easy development of applications that make use of LLMs, such as GPT-3 LangChain offers a suite of tools, including an orchestration tool for prompts, making it easier for developers to chain different prompts interactively. It also provides a standard interface for chains, enabling developers to create sequences of calls that go beyond a single LLM call, and many more...

Below is a high level overview of LangChain in form of a Sketchnote 🙌🙌
