🧠📚🌟 I am a big fan of Naval Ravikant for his exceptional raw intellect, first principles thinking, and precise articulations! 🙌 In a captivating old podcast with Shane Parrish, he delved into the state of our (broken) education system and ways to enhance it. Taking cues from that conversation and adding my own insights, I crafted a Medium story. Check it out! 📄

<https://lnkd.in/dPv8daKP>

📄🔗 In this article, I discuss the essential skills that one should embrace to not only survive but truly thrive in our increasingly unpredictable world. Drawing from the story, here are some of the skills I mentioned:

- 🥦 Nutrition-Cooking
- 💪 Health-Fitness
- 🧠 Psychology-Happiness
- 🧘 Yoga-Meditation
- 💰 Finance
- 💻 Programming
- 🏛 Civic sense
- ➕ Arithmetic-Mathematics
- 🔍 Google Search
- ⚙ Prompt Engineering
- 🧪 Science experiments

📚 While I certainly don't intend to disregard the existing curriculum entirely (just a tad 😊), I firmly believe that

incorporating these skills can empower individuals to navigate the complexities of the modern world. 💡

🤔 Do you have any other valuable suggestions? I'd love to hear them! Drop your thoughts in the comments below and let's spark a conversation for a brighter future! ✨
