The new kid on the block, BARD!!!

Here is a super quick comparison of the current ruler (read #chatgpt) and the newcomer, #bard, with what else but a prompt (credits: Zain Kahn) to generate an elevator pitch for your business.

"Generate a 30 second elevator pitch using the description of my company (or career) below. The pitch should be brief, punchy, and compelling. [insert business description]"

Inserted my own business description (somewhat raw, crude but just trying) as: 🐱

"I have started an individual AI Coaching business, where I can be a sounding board to CXOs, do mentoring of teams, plan road-map, help in hiring, participate in brain-storming, etc. I would prefer a retainer-ship model where I will work for say 2 to 3 hrs a week and charge monthly fees, with the total contract at least for a year. Please note that I won't be able to participate in doing demos for customers, hands-on deliverables, etc. I am not comfortable with the client showing myself as an employee for funding or otherwise, asking me to post for LinkedIn for wider reach, etc."

ChatGPT response :

""""

Attention all CXOs and team leaders! Are you struggling to keep

"Hi, I'm [your name], and I'm an AI Coach. I help CXOs and teams get the most out of AI. I can be your sounding board, mentor, roadmap planner, hiring expert, and brainstorming partner. I work on a retainership model, where I commit to 2-3 hours of work per week for a minimum of one year. I don't do demos, hands-on deliverables, or LinkedIn posts. I'm here to help you succeed with AI."

- Be confident and enthusiastic.
- Make eye contact and speak clearly.

- Tailor your pitch to your audience.
- Practice, practice, practice!

I hope this helps!

Looks promising? Let me know which one did you like more?

Will be trying #bard more in the coming days,  
as #BardByGoogle is claimed to help people with programming  
and software development tasks, including code generation, code  
debugging, and explanation.
