(Re) Naming Ceremony 🎉

Got to know that its suggested not to have word "GPT" (Generative Pretrained Transformers) in the name of your product or service (ref: OpenAI <https://openai.com/brand>, also AbdulMajedRaja RS's video <https://lnkd.in/dJ6wvVKf>) 🚫

Although I don't have any product or even (micro)SaaS (Software-as-a-Service) in place (yet) having a word "GPT" , I do have a GitHub repo called, 'SaaSGPT'. 🤪

Even though, it seems quite harmless to have "GPT" there, thought of taking this opportunity to rename the repo to a more unique name. Decided to have a Sanskrit name. Asked for options to, who else, but Chat"GPT". 🗣️

For the prompt "Suggest Sanskrit names for a person who is intelligent, all-knowing and well read", it suggested a few names, the first one looked nice: "Sarvajna". Although script-wise its correct spelling (ref: Udayashreyas N.J's <https://lnkd.in/dVDcX-Gh>) but phonetically it looked a bit non-intuitive to a native Marathi speaker like me, so settled on "Sarvadnya". So that's the new repo name in place of "SaaSGPT". (ChatGPT confirmed that both mean the same, pic below). 😊

So the (re) named repo is at <https://lnkd.in/ddCSQy7s> 📌

For those who were "watching" the SaaSGPT repo or had forked it

in the past, please confirm the same for the renamed repo.

Thanks!! 🙏

#sanskrit Microsoft #microsoft

Suggest Sanskrit names for a person who is intelligent, all-knowing and well read.

1. Sarvajna (सर्वज्ञ)
2. Sarvavid (सर्वविद)
3. Bahushruta (बहुश्रुत)
4. Samprati Jna (संप्रति ज्ञ)
5. Akhand Jna (अखण्ड ज्ञ)
6. Sarvasakshi (सर्वसाक्षी)
7. Sarvabuddha (सर्वबुद्ध)
8. Sarvabodha (सर्वबोध)
9. Anantgyan (अनंतज्ञान)
10. Sarvashaktiman (सर्वशक्तिमान)

Is Sarvadnya better or Sarvajna?

Both "Sarvadnya" and "Sarvajna" are Sanskrit words that refer to someone who has knowledge or understanding of everything.

The word "Sarvadnya" is derived from the words "Sarva" meaning everything and "adnya" meaning knowing. So, Sarvadnya literally means "knowing everything".

The word "Sarvajna" is derived from the words "Sarva" meaning everything and "jna" meaning knowledge. So, Sarvajna literally means "having knowledge of everything".

Both words convey similar meanings and can be used interchangeably to refer to someone who is all-knowing or has complete knowledge. It ultimately comes down to personal preference which one to use.
