🚀 AutoGen: KOSAIR (Know Open Source AI Repository) 🚀

AutoGen is an open-source programming framework designed to build AI agents and enable cooperation between them to solve tasks. Think of it as the PyTorch for agentic AI—streamlining development and research in this exciting field.

✨ Key features include:

- ➡ Agents capable of interacting with each other
- ➡ Support for various LLMs and tool usage
- ➡ Autonomous workflows & human-in-the-loop capabilities
- ➡ Multi-agent conversation patterns for complex tasks

🔗 Check it out on GitHub: [microsoft/autogen](https://github.com/microsoft/autogen)

I have already written a couple of blogs on this topic (links in the comments below) and also planning to talk on this in coming days.
