Jumping on to the ChatGPT bandwagon ...

ChatGPT is next in the series of GPTs (Generative Pre-trained Transformers) coming from [OpenAI](#). They are based on a revolutionary architecture called 'Transformers', initiated by [Google](#). Transformers are based on one of the popular neural network architectures, called 'Encode-Decoder' networks, typically used for Language Modeling (predicting the next word) or Machine Translation.

Following sketchnote tries to give (without even hinting to do any fair justice) an overview of ChatGPT:

[OpenAI](#) [Sam Altman](#) [Google](#) [Microsoft](#) [#chatgpt](#) [#ai](#) [#nlp](#) [#openai](#) [#gpt](#)

First, thanks a lot for your overwhelming response to this post. Apart from the comments, reposts and likes that you are seeing here, received 500+ connection requests!! It will take some time for me to go through them. Unfortunately, with them, the MAX LIMIT on LinkedIn connections is getting reached. So, the later requests will need to be denied. Sorry to the ...see more

[Yogesh Haribhau Kulkarni](#) This is very good information on understanding how ChatGPT must be generating the responses. How difficult will it be to make it ask more questions for to figure out the intent to make it more conversational? What kind of NN Architecture will be needed to do that?

Great illustration as always [Yogesh](#) ! Curious, is this hand drawn ? If yes, you have another great skill in addition to technology :)

[Anagha V.](#) - FYI.

Great info and summarization [Yogesh Haribhau Kulkarni](#)! I believe ChatGPT has been able to pass the Turing Test in Dec 2022 and it is supposed to be only the second chat-bot to achieve this feat!
