Desi Stack

Desi/India Stack is posing serious challenges to global giants especially in the financial ecosystem.

With 'Aadhaar for identity', 'Unified Payment Gateway (UPI, BHIM app) for money transfer', primarily open-source based India stack is moving India towards self-reliance (atmanirbhar). Aadhaar 2.0 will use AI, Blockchain, ML to chuck ghost beneficiaries and to make system more secure.

A new kid on the block is going to be ONDC (Open Network for Digital Commerce). Its going to be population-scale platform joining buys and sellers, small or big.

Thanks for sharing this [Yogesh](#) sir, we would witness new India in by 2030.
Have a feeling next few years will define so much about India. Aatmanirbhar
is at his pick now!!

Solution Architect - Industry X

I am excited to see this development and cannot wait to see this working.
To Compliment this, if Cash Transactions can be Traced (Even if they do not
go through financial institutes), Economy Chain would become more
Transparent and ensures Deserved Value to the Producers and Sellers.
