Building a Career in AI: Public Speaking is Key! 🎤

One of my top suggestions for those looking to establish themselves in the AI domain is to give public talks. 🧠 ✨

Once you have mastered the basics—such as the necessary mathematics, programming, and ML/DL algorithms—the next step is to choose a topic to work on. After you've prepared the theory and gained hands-on experience, it's time to share your knowledge. 📄 🔍

Teaching is the best way to learn.

It compels you to prepare thoroughly, anticipate potential questions, and boosts your confidence in the subject. 🌟 The added benefits include networking opportunities and enhancing your reputation. 🌐 🤝

So, do take this suggestion seriously! 🙏

If you're looking for a platform to give such talks, comment below with your background and topics. 📄 Many organizers in my network will see these comments and can connect with you directly. 🌟 🔗

If you want to speak on my platform, i.e. the online talk series "LetsAI", mention that as well. 🌐 This opportunity is open and free for all, and it is voluntary (I don't pay you, you don't pay

me). You can either comment below or email me at [firstname lastname] at Yahoo dot com. 

Being a speaker is special. वक्ता दशसहस्रेषु (meaning? do comment below).
