Wish to share that I have been nominated for the 7th consecutive year for the [Google Developer Experts](#) Expert (GDE) program by [Google Developers Group](#). 🎉

The GDE program recognizes professionals who contribute to the developer ecosystem by sharing knowledge, mentoring others, and helping communities grow. Been part of the program as a GDE in Machine Learning (TensorFlow) earlier, and now continuing the journey as a GDE in Artificial Intelligence (AI).

Being a GDE goes far beyond technical expertise. It involves contributing to the community in multiple ways, through technical talks, workshops, content creation, open-source contributions, mentoring developers, writing articles, and helping businesses and developers adopt technologies responsibly and effectively.

For those interested in becoming a GDE, enrollment is nomination-based. Candidates are typically recognized for their sustained community contributions, technical depth, and impact. You can learn more about the program and the nomination process on the official Google Developers Experts page (https://lnkd.in/deRE_haG).

My GDE profile is at <https://lnkd.in/d3snu2rb>
