🚀 crewAI: KOSAIR (Know Open Source AI Repository) 🚀

crewAI is for multi-agent collaboration. Designed to help AI agents work together like a well-synchronized crew, CrewAI is wonderful for building smart assistant platforms, automated customer service teams, or cutting-edge research collectives. It lays the foundation for advanced multi-agent interactions.

Check out the repo on GitHub: crewAIInc/crewAI

I have written a Medium article on this topic with a use-case in mind (link in the comments below).
