AI Coach (Machine Learning, Natural Language Processing, Generative AI) ...

🎩 Donning a Product Manager Hat now! 🚀

Wish to present a couple of ideas around Knowledge Graphs.
💡 Written them in the form of high level specifications along with some hints about the implementations.

📄 Specs for 'Knowledge as a Service' (KaaS) project https://lnkd.in/dATWr6RF

📄 Specs for 'Chatbot on Knowledge Graph using Large Language Models' https://lnkd.in/dd8XtYrv

🌐 Feel free to further develop and implement these ideas if they resonate.

While they maintain domain-agnosticism, they certainly find applications across diverse sectors—from medical research to legal analysis. Additionally, there's an ambitious stretch goal on the horizon: integrating Geometric Deep Learning for predictive queries. Your insights and contributions are more than welcome!
🌐 🚀 🌟
