Spoke as a panelist at the 'Google I/O Extended' event in Pune. Discussion revolved mainly around topics related to AI (Artificial Intelligence), ML (Machine Learning), advances in NLP (Natural Language Processing), startup ecosystem, building career in Data Sciences and likes.

Such events are being organized in coming days, not just in Pune but all over. Feel free to join (link in comments).

Thanks to **GDG Pune** and **Women Techmakers** for this extempore opportunity to speak at this well-organized and well-received meetup, co-hosted by **eChai Ventures** at **Ideas To Impacts**

As announced during the session, I have setup a dedicated time, say 2pm to 4pm (India time zone), every Saturday, to discuss queries you may have.

Queries could be technical, on topics such as Machine/Deep Learning, AI, Natural Language Processing, Geometric Modeling and intersection of them with other domains. They can be non-technical also, such as mid-career transition, career in Data Science and likes.

If you wish to setup such discussion, please mention "Interested" in the comments and send email to my firstnamelastname at yahoo dot com specifying the topic and also preferred date & half-an-hour time-slot. I will revert back with a meeting invite.

Needless to say, this effort is personal, voluntary and non-commercial. Free and open to all.

It was really great experience by attending this session, helped bit more
usages of ML, AI, NLP in Google's new upcoming products.. **Yogesh Kulkarni**
Really thanks for sharing your experience and knowledge with us..
