🌟 Software Openings for Freshers? Help Us Connect Talent 🧑

We get this question often: "Do you have openings for software freshers?"

Not just a few people. Hundreds. 100

Fresh grads with decent fundamentals, some hands-on projects, ready to work. But most companies either don't hire freshers or bury those roles so deep that no one finds them.

So here's the ask: If your company has entry-level software roles, now or in the next few months, let us know. We'll connect you with candidates from our network.

Are you looking at any specific Tech Stack? Something like:

- ➡ Cloud ops
- ➡ Data engineering
- ➡ Chatbot development
- ➡ Full stack
- ➡ Certifications
- ➡ DevOps, QA, frontend, backend, whatever you need

Reach us:

Email: puneaicommunity at gmail dot com

CC: yogeshkulkarni at yahoo dot com

Subject: Software openings for freshers/interns

Include the tech stack, rough timeline, and whether it's full-time or internship.

We're not a placement agency. We're just trying to make introductions that wouldn't happen otherwise. If you've got roles, share them. If you know someone who does, tag them. Feel free to comment below!! 🙌
