Attention Educational Institutes!!!

AI is no longer a “good to have” skill. It is becoming a foundational capability for every teacher, student, and institution. 🤖 📖

Educational institutes now have a huge opportunity (and responsibility) to prepare faculty and students for the AI era.

One scalable approach is: 👉 Empower teachers first. Teachers then naturally amplify AI adoption across thousands of students over the years.

Proposing a 3-level institutional AI capability framework:

- ◆ AI Literacy Drive (AILD)

For all faculty members across departments.

Focus: Prompt engineering, AI tools, productivity workflows, responsible AI usage.

Even a 1-hour course/certification can dramatically improve awareness and confidence.

- ◆ AI Proficiency Drive (AIPD)

For Computer/IT/AI faculty and interested teachers.

Focus: Building practical AI applications such as RAG systems, private chatbots on institutional data, AI automation tools, and student innovation projects.

- ◆ AI Expertise Drive (AIED)

For researchers, PG students, and PhD scholars.

Focus: Advanced AI research, publications, conferences, industry collaborations, and innovation.

This should not remain limited to only CSE/IT departments. Mechanical, Civil, Commerce, Arts, Pharmacy, Management, and all other disciplines can benefit from AI-assisted workflows and domain applications.

Institutes that systematically adopt AI today will build:

- ✓ Better student readiness
- ✓ More productive faculty
- ✓ Stronger research culture
- ✓ Better industry alignment
- ✓ Long-term institutional differentiation

I would be happy to help institutes design and initiate such AI capability drives.

Please feel free to connect with me ([Yogesh Haribhau Kulkarni](#)) at yogeshkulkarni at yahoo dot com or with the [Pune AI Community](#) (PAIC) for further discussions.

EMPOWER TEACHERS. INSPIRE STUDENTS. BUILD AN AI-READY INSTITUTE.

BUILD AN AI-FIRST CAMPUS. TOGETHER.

Teacher First → Student Multiplier
Empowering teachers with AI skills creates a lasting ripple effect across every classroom and future generation.

1. AI LITERACY DRIVE (AILD)
AI for Every Teacher
For all faculty across departments.
Build confidence in using AI tools to enhance

2. AI PROFICIENCY DRIVE (AIPD)
Build and Apply AI
For CS/IT/AI faculty and interested teachers.
Build practical AI applications and solve real

3. AI EXPERTISE DRIVE (AIED)
Research and Innovate
For researchers, PG/PhD students & advanced faculty. Drive high-quality research and
