Conversations on AI Careers & Mid-Career Transitions

Sometime back, I had the opportunity to speak with [Dr. Anand Kolharkar](#) of [Opine Group](#) in a two-part conversation about AI careers and transitioning into the field mid-career.

Many professionals today are wondering: Is it too late to move into AI or Data Science? In these discussions, we explored practical perspectives based on my own journey and experiences.

Here are the recordings:

Part I: My personal AI journey and thoughts on navigating a mid-career transition into

AI. <https://lnkd.in/dH8GrpAG>

Part II: A discussion around my sketchnote framework that explains how professionals can approach a transition into Data Science / Artificial Intelligence. <https://lnkd.in/dsFQHyAZ>

If you are considering a career shift into AI, these discussions may offer some practical direction. Would love to hear your thoughts or experiences about mid-career transitions in the AI era.
