Wish to share that I have been appointed as 'Professor of Practice' at the Department of Mechanical Engineering, COEP (College of Engineering Pune) Technological University 🎓 ✨

In this role, I will be contributing through teaching, mentoring, and guiding research in the areas of Computer-Aided Design (CAD) and Artificial Intelligence (AI).

A few reflections 😊

➡ I have been visiting this campus since childhood, as my father worked here in the accounts department. I always dreamed of studying here and was fortunate to complete my bachelor's degree here from 1990 to 1994. After returning from my master's studies in the USA, I began teaching Geometric Modeling in the same department as a visiting faculty member.

➡ In 2013, I left my industry role and joined the department as a full-time PhD scholar. During that period, I also taught semester-long courses as part of my academic responsibilities.

➡ After completing my PhD, my professional focus gradually expanded toward Artificial Intelligence. Since then, I have had the opportunity to teach AI-related courses at COEP as a visiting faculty member whenever opportunities arose, and that association has continued over the years.

➡ To now return to the very institution where I once aspired to study, later studied as both a bachelor's and doctoral student, and now serve as a Professor of Practice, contributing to the next generation of engineers, feels truly special 🚀 ❤️. A genuine full-circle moment.

I am grateful to all my teachers, mentors, colleagues, students, friends, and family members who have been part of this journey.
