What started as an idea to simplify "Retrieval Augmented Generation (RAG)" has now turned into a complete learning journey 🧠💡

The "RAG to Riches" series was designed with one clear goal: 🙌 Enable anyone to confidently start building RAG-based applications and here's what we covered across the series:

- ◆ Python Basics (4 sessions): building the programming foundation : <https://lnkd.in/dNAj8K-X> (by [Anjali Kulkarni](#))
- ◆ Generative AI Basics (4 sessions): ML, NLP, embeddings & LLMs : <https://lnkd.in/dNn2w2dw> (by [Yogesh Haribhau Kulkarni](#))
- ◆ Intro to RAG: connecting knowledge with intelligence : https://lnkd.in/d_SJGuy3 [Yogesh Haribhau Kulkarni](#))
- ◆ Bonus: Intro to AI Agents: taking a step toward Agentic RAG : <https://lnkd.in/dnShVQya> (by [Yogesh Haribhau Kulkarni](#))

🙌 A big thank you to everyone who attended, learned, asked questions, and supported the initiative. Your engagement is what makes this community truly powerful.

🚀 What's next?

We're now opening up the stage to YOU, the community!

🙌 Want to share your knowledge, demo a project, or lead a session?

We'd love to have you contribute and grow with us.

💬 Drop a comment or reach out us with a brief description of your talk and if available, a sample video youtube link of your past talk to [puneaicommunity at gmail dot com](mailto:puneaicommunity@gmail.com) cc [yogeshkulkarni at yahoo dot com](mailto:yogeshkulkarni@yahoo.com) 🚀!
