🎓 Guiding the Next Generation into AI 🚀

Had the opportunity to conduct a mentorship session for students under the Educational Assistance Scheme (EAS), an initiative by [Seva Sahayog Foundation](#).

The session was delivered in Marathi (with English slides) to make it more relatable and effective 💡

Covered:

- ◆ What is AI?: breaking down the fundamentals
- ◆ How to build a career in AI: practical pathways & guidance

It was nice to interact with 120+ students from engineering, computer science, and commerce backgrounds, all eager to learn and grow 🙌

EAS, now in its 7th year, has supported 1000+ students in pursuing higher education through financial assistance and mentorship. Truly impactful work 🙏

Grateful for the opportunity to contribute and support such bright minds in their journey ❤️
